

The brainchild of an in-depth technical project, the Dolly folding chair combines elegance and the formal lightness of its general design with a sophisticated and robust structural system. Available in different colours, including vivid chromatic tones, Dolly comes in three versions: with whitened oak seat, or in the same plastic material as the structure. The two versions help Dolly adapt to any setting: the wood is mainly suited to domestic surroundings. The plastic-seated version can adapt to a wide range of surroundings from the home to the office, due to its durability and easiness to clean. In this way, the item's appeal extends as far as businesses.

items 4865 excluded

Materials

Frame: high-strength fiberglass-reinforced polypropylene

Seat: high-strength fiberglass-reinforced polypropylene

Wood seat: plywood stained bleached beech
